Opportunity to Comment on Snowmaking and
Summer Uses Project at Copper Mountain Resort
The White River National Forest (WRNF) is preparing an environmental assessment for Copper
Mountain Resort (CMR) to implement the
Snowmaking and Summer Uses Project. The proposed project would take place entirely within the
existing CMR Special Use Permit (SUP) area.
The Forest Supervisor, Scott Fitzwilliams, will determine whether or not to approve all or part of the proposal, including:

mine whether or not to approve any posal, including:

• The expansion of snowmaking coverage by approximately 86 acres and accompanying stream mitigation to ensure the proposed in accompanying and the implemental in ac-

snowmaking coverage can be implemented in cordance with required Forest Plan stream he

cordance with required Forest Plan stream health standards;

• Expansion of the existing mountain biking trail network by approximately 23.6 miles;

• Expansion of the existing hiking trail network by approximately 13.7 miles;

• The addition of summer programming centered around overnight camping; and

• The extension of the existing "A-1" mountain access road by approximately 370 feet to provide access to the Oile Lind parcel.

• The proposed projects are intended to improve available recreation opportunities at CMR in several ways. The snowmaking component of the project would ensure timely opening of the resort as well as adequate snow coverage on all trails where snowmaking infrastructure is installed. The summer trails and summer programming components of the project would widen the variety of adventure-based recreation opportunities available to people of all ability levels and during all seasons of the year.

• There is a need to implement these projects to improve upon existing and to provide additional recreation opportunities for the public at CMR, which

would ultimately ensure the availability of high quality recreation opportunities on the WRNF.
